PlugIn interior contact

DEFA PlugIn interior contact is to be used as a power socket in a vehicles cabin to connect the schuko plug (A) on a DEFA interior heater. The DEFA PlugIn interior contact's plugin male contact (B) are connected to the DEFA WarmUp system via a suitable DEFA Extension cable. The extension cable is normally gated trough the firewall and into the engine room.

Fasten the DEFA PlugIn interior contact using the two enclosed screws.

DEFA AS is conforming to the requirements of both ISO 9001-2008, ISO 14001:2004 and OHSAS 18001:2007. In addition to this, our engine heaters and cables are conforming to the requirements of ISO/TS 16949:2002.

Item number

460829 (Weight: 58gr.)
